

LIST OF FIGURES

Figure 1.1. CareerFit system context.....	6
Figure 1.2. CareerFit use-case overview	8
Figure 1.3. CV review, confirmation, and matching sequence.....	12
Figure 1.4. Feedback learning and recomputation sequence	14
Figure 1.5. AutoFit decision flow	16
Figure 1.6. Secure email-action confirmation and redemption sequence.....	21
Figure 2.1. Distinction between matching, recommendation, and recruitment action	23
Figure 2.2. TF-IDF vectorization and cosine-similarity pipeline	25
Figure 2.3. Rocchio relevance-feedback vector update.....	28
Figure 2.4. Human-in-the-Loop control cycle in CareerFit.....	30
Figure 2.5. CareerFit container and component architecture.....	34
Figure 2.6. CareerFit logical entity relationships	37
Figure 2.7. Local and containerized deployment topology	40
Figure 3.1. Backend module structure and request flow	42
Figure 3.2. JWT authentication and authorization boundaries	44
Figure 3.3. CV ingestion, review, and confirmation pipeline.....	46
Figure 3.4. Seed-corpus initialization and TF-IDF construction	47
Figure 3.5. Direct score and Potential assessment flow	49
Figure 3.6. Feedback processing and post-commit learning	50
Figure 3.7. Application and invitation state transitions	51
Figure 3.8. Per-account AutoFit policy guard	53
Figure 3.9. Hashed email-action token and confirm-then-POST flow	54
Figure 3.10. Frontend routes, server-side catalogue, and API data flow	56
Screen 3.1. Candidate urgent-job catalogue	57
Screen 3.2. Candidate AutoFit policy settings.....	57
Screen 3.3. Candidate CV upload entry point	58
Screen 3.4. Recruiter Jobs and applicant workspace.....	58
Screen 3.5. Recruiter Talent Pool and Potential CV	59
Screen 3.6. Administrator audit logs	59
Figure 4.1. Evaluation environments and evidence sources.....	63
Figure 4.2. Baseline and Rocchio benchmark metrics at $K = 5$	66
Figure 4.3. P0 end-to-end workflow coverage	68
Figure 4.4. Local Job-search latency distribution.....	70
